### Preamble

Pursuant to the provisions of the "San Diego Maintenance Assessment District Ordinance" (being Division 2, Article 5, Chapter VI beginning at Section 65.0201 of the San Diego Municipal Code), provisions of the "Landscaping and Lighting Act of 1972" (being Part 2 of Division 15 of the California Streets and Highways Code), applicable provisions of "Proposition 218" (being Article XIID of the California Constitution), and provisions of the "Proposition 218 Omnibus Implementation Act" (being California Senate Bill 919) (the aforementioned provisions are hereinafter referred to collectively as "Assessment Law"), in connection with the proceedings for the TORREY HIGHLANDS MAINTENANCE ASSESSMENT DISTRICT (hereinafter referred to as "District"), BOYLE ENGINEERING CORPORATION, as Assessment Engineer to the City of San Diego for these proceedings, submits herewith this report for the District as required by California Streets and Highways Code Section 22565.

FINAL APPROVAL, BY RESOLUTION NO. \_\_\_\_\_ ,  
ADOPTED BY THE CITY COUNCIL OF THE CITY OF SAN  
DIEGO, COUNTY OF SAN DIEGO, CALIFORNIA, ON THE  
\_\_\_\_\_ DAY OF \_\_\_\_\_, 2006.

---

Elizabeth Maland, CITY CLERK  
CITY OF SAN DIEGO  
STATE OF CALIFORNIA

## Executive Summary

**Project:** Torrey Highlands  
Maintenance Assessment District

**Apportionment Method:** Equivalent Benefit Unit (EBU)

	<b>FY 2006</b>	<b>FY 2007 <sup>(1)</sup></b>	<b>Maximum <sup>(2)</sup> Authorized</b>
<b>Total Parcels Assessed:</b>	1,823	1,841	--
<b>Total Estimated Assessment:</b>	\$322,012	\$357,406	--
<b>Total Number of EBUs:</b>	4,466.57	4,791.60	--
<i>Zone 1</i>	1,757.18	1,756.18	--
<i>Zone 2</i>	1,814.56	2,140.59	--
<i>Zone 3</i>	894.84	894.84	--
<b>Assessment per EBU:</b>			
<i>Zone 1</i>	\$70.92	\$70.92	\$127.25 <sup>(3)</sup>
<i>Zone 2</i>	\$108.78	\$108.78	\$234.16 <sup>(3)</sup>
<i>Zone 3</i>	\$0.00	\$0.00	\$127.25 <sup>(3)</sup>

<sup>(1)</sup> FY 2007 is the City's Fiscal Year 2007, which begins July 1, 2006 and ends June 30, 2007. Total Parcels Assessed, Total Estimated Assessment, and Total Number of EBUs may vary from prior fiscal year values due to parcel changes and/or land use re-classifications.

<sup>(2)</sup> Maximum Authorized annual amounts subject to cost indexing provisions set forth in this Assessment Engineer's Report.

<sup>(3)</sup> Fiscal Year 2006 maximum authorized annual assessment increased by cost indexing factor of 7.01%.

**District History:** In Fiscal Year 2005, by a ballot proceeding, majority property owners approved the formation of the District, Fiscal Year 2005 and maximum authorized assessments for subsequent years, and provisions for annual cost indexing.

**Annual Cost Indexing:** An increase of assessments, under authority of annual cost indexing provisions, is required for Fiscal Year 2007.

**Bonds:** No bonds will be issued in connection with this District.

---

## Background

Torrey Highlands, also referred to as “Subarea 4” of the North City Future Urbanizing Area, is generally located north of Los Peñasquitos Reserve and east of Rancho Peñasquitos. The City of San Diego (City) retained Boyle Engineering Corporation (Boyle) to prepare an Assessment Engineer’s Report for the formation of the Torrey Highlands Maintenance Assessment District (District). The Assessment Engineer’s Report proposed Fiscal Year 2005 assessments, maximum authorized assessments for subsequent years, and provisions for annual cost indexing of the maximum authorized assessments. The Assessment Engineer’s Report was approved and assessments confirmed in Fiscal Year 2005.

---

## District Proceedings for Fiscal Year 2007

This District is authorized and administered under the provisions of the “San Diego Maintenance Assessment District Ordinance” (being Division 2, Article 5, Chapter VI beginning at Section 65.0201 of the San Diego Municipal Code), provisions of the “Landscaping and Lighting Act of 1972” (being Part 2 of Division 15 of the California Streets and Highways Code), applicable provisions of “Proposition 218” (being Article XIID of the California Constitution), and provisions of the “Proposition 218 Omnibus Implementation Act” (being California Senate Bill 919) (the aforementioned provisions are hereinafter referred to collectively as “Assessment Law”). This report has been prepared in compliance with Assessment Law.

The purpose of the proposed proceedings and this Assessment Engineer’s Report is to update the District budget and assessments for Fiscal Year 2007. The Fiscal Year 2007 assessments proposed within this Assessment Engineer’s Report do not represent an increase over the previous year’s assessments. This increase is under the authority of annual cost indexing provisions approved by property owners. Therefore, the vote requirements of Section 4 of Article XIID do not apply to these proceedings.

A public hearing will be scheduled where public testimony will be heard by the Council, and the Council may, at its discretion, adopt a resolution ordering the levying of the proposed assessments.

## **Bond Declaration**

No bonds will be issued in connection with this District.

---

## **District Boundary**

The boundary of the District generally coincides with the Torrey Highlands subarea, with the exception of certain areas excluded due to their physical separation from the core community area. For benefit apportionment purposes, the District has been divided into three zones as shown in Exhibit A.

The Boundary Map & Assessment Diagram for the District are on file in the Maintenance Assessment Districts section of the Park and Recreation Department of the City of San Diego and by reference are made a part of this report. The Boundary Map and Assessment Diagram for the District are available for public inspection during normal business hours. A reduced copy of the Boundary Map is included as Exhibit A.

---

## **Project Description**

The project to be funded by the proposed assessments is the maintenance of specified landscaped and hardscaped medians, landscaped rights-of way, adjacent slopes, sidewalks, gutters and brow ditches within the District. Maintenance activities include, but are not limited to: litter control; fertilizing; irrigation and maintenance of irrigation components; weed control; pest control; pruning; planting; tree maintenance; gutter, sidewalk and hardtop cleaning; maintenance necessary for the health and appearance of the plant material; cleaning of brow ditches and activities necessary to address safety concerns.

The maintenance areas (as generally shown in Figure 1) are located along five primary corridors: Carmel Valley Road, Carmel Mountain Road, Camino Del Sur, Torrey Meadows Drive, and Torrey Santa Fe Road.

The District may also fund minor capital improvements to the extent such improvements are consistent with the current apportionment methodology.

The engineering drawings for the improvements to be maintained by the District will be on file at Map Records in the City Engineer's

office. The specifications for the maintenance to be performed will be contained in a future City contract and will be on file with the City Clerk and the Park and Recreation Department. The specifications will be available for public inspection during normal business hours.

---

## **Separation of General and Special Benefits**

Consistent with City policy for the public at large, the City will provide the District with annual contributions from the Gas Tax Fund for median maintenance (29¢ per square foot of landscaped median and 11.81¢ per square foot of hardscaped median) and from the Environmental Growth Fund for open space maintenance (\$34.80 per acre). These cost allocations, reviewed and adjusted annually by the City, are considered to be “general benefits” administered by the District. All other maintenance, operations, and administration costs associated with the District, which exceed the City’s contribution to the public at large, are accordingly considered to be “special benefits” funded by the District.

---

## **Cost Estimate**

### **Estimated Costs**

Estimated Fiscal Year 2007 annual expenses, revenues, reserves, and assessments (provided by the City) are included as Exhibit B hereto.

### **Annual Cost Indexing**

With the passage of Proposition 218, any proposed increase in assessments must be placed for approval before the property owners by a mail ballot and a public hearing process, similar to these proceedings. A majority of ballots received must be affirmative for the City Council to confirm and levy the increased assessments. For small assessment districts or districts with relatively low dollar assessments, the cost of an engineer’s report, balloting, and the public hearing process can potentially exceed the total cost of the increase. These incidental costs of the proceedings can be added to the assessments, resulting in even higher assessments.

Indexing assessments annually to the San Diego Consumer Price Index for Urban Consumers (SDCPI-U) plus 3%, as approved by the District

property owners in Fiscal Year 2005, allows for minor increases for normal maintenance and operating cost escalation without incurring the costs of the Proposition 218 ballot proceedings. Any significant change in the assessment initiated by an increase in service provided or other significant changes to the District would still require the Proposition 218 proceedings and property owner approval.

The maximum authorized assessment established in the Fiscal Year 2005 proceedings are authorized to be indexed (increased or decreased) annually by the factor published in the SDCPI-U plus 3%. Fiscal Year 2006 was the first year authorized for such indexing. It has been determined that an increase of assessments, as authorized by the cost indexing provisions, is not required for Fiscal Year 2007.

---

## Method of Apportionment

### Estimated Benefit of Improvements

The Transportation Element of the City's General Plan and the general policy recommendations found in the Torrey Highlands Subarea Plan establish several goals for the community's transportation system. The improvements to be maintained by the District are consistent with the goals for safety and pleasing aesthetics. The City's General Plan also supports the establishment of community landscape improvement and maintenance districts, such as this District, to fund maintenance of enhanced improvements and services.

The major and arterial streets within the District (i.e., Carmel Valley Road, Carmel Mountain Road, and Camino Del Sur) are the backbone of the local street network. They serve as the primary access routes for inter-community and intra-community trips and thus serve all parcels within the District. All parcels within the District benefit from the enhancement of these streets and the enhanced community image provided by the improvements being maintained by the District.

The collector and neighborhood streets within the District (i.e., Torrey Meadows Drive and Torrey Santa Fe) serve as the primary access routes to and from the major and arterial streets for parcels within a limited area, and thus serve a limited number of parcels. Only those parcels served by such collector and neighborhood streets benefit from their enhancement. Consistent with this concept, the District has been

sub-divided into three zones (as shown in Exhibit A), generally described as follows:

**Zone 1:** Zone 1 consists of all parcels in the District except those parcels in Zones 2 and 3 described below. Zone 1 contains the majority of the development within the District.

**Zone 2:** Zone 2 consists of those parcels that receive access via Torrey Meadows Drive and Torrey Santa Fe Road. Zone 2 contains a variety of residential and non-residential land uses.

**Zone 3:** Zone 3 consists of those parcels that will receive access upon the completion of Camino Del Sur to the south. Zone 3 includes portions of the Rhodes Crossing development and other non-residential land uses.

Table 1 summarizes the maintenance corridors and corresponding zones that receive benefit.

**TABLE 1: Maintenance Areas & Benefiting Zones**

Maintenance Corridor	Benefiting Zones	
	FY 2007 <sup>(1)</sup>	Ultimate
Carmel Valley Road	1, 2	1, 2, 3
Carmel Mountain Road	1, 2	1, 2, 3
Camino Del Sur	1, 2	1, 2, 3
Torrey Meadows Drive	2	2
Torrey Santa Fe	2	2

<sup>(1)</sup> Zone 3 parcels will be assessed upon completion of the circulation element providing access to the area, and satisfaction of remaining conditions permitting development.

### Apportionment Methodology

The total cost for maintenance of District improvements has been assessed to the various parcels in the District in proportion to the estimated Equivalent Benefit Units (EBUs) assigned to each parcel.

The total assessment for a given parcel is equal to the parcel's total EBUs multiplied by the Unit Assessment Rate (unique to the zone in which the parcel is situated) as shown in the following equation:

$\text{Total Assessment} = \text{Total EBUs} \times \text{Unit Assessment Rate}$
--

## Equivalent Benefit Units (EBUs)

EBUs for each parcel have been determined as a function of two factors, a Land Use Factor and a Benefit Factor, related as shown in the following equation:

$$\text{EBUs} = (\text{Acres or Units}) \times \text{Land Use Factor} \times \text{Benefit Factor}$$

Each of these factors is discussed below. Parcels determined to receive no benefit from maintenance of the District improvements have been assigned zero (0) EBUs.

### *Land Use Factor*

Since the improvements to be maintained by the District are primarily associated with the Transportation Element of the General and Community Plans, trip generation rates for various land use categories (as previously established by the City's Transportation Planning Section) have been used as the primary basis for the development of Land Use Factors. While these trip generation rates strictly address only vehicular trips, they are also considered to approximately reflect relative trip generation for other modes of transportation (e.g., pedestrian trips, bicycle trips, etc.), and are considered the best available information for these other transportation modes.

The special benefits of landscaped and hardscaped improvements maintained by the District are linked to trip generation primarily by the public safety and aesthetic enhancement of the circulation element. Trip generation rates provide the required nexus and basis for assigning relative proportionality of potential benefit to the various land use/zoning classifications (as defined by the City's Municipal Code) within the District.

Land use/zoning classifications have been grouped with averaged trip generation rates assigned to establish the Land Use Factors as shown in Table 2.

**TABLE 2: Land Use Factors**

<b>Land Use/Zoning</b>	<b>Code</b>	<b>Land Use Factor <sup>(1)</sup></b>
Residential – Detached Single Family	SFD	1.0 per dwelling unit
Residential – Condominium	CND	0.7 per dwelling unit
Residential – Multi-Family & Apartment	MFR	0.7 per dwelling unit
Agricultural	AGR	0.02 per acre
Commercial – Office & Retail	COM	45.0 per acre
Educational – Primary & Secondary	EPS	5.0 per acre
House of Worship	CRH	2.8 per acre
Industrial	IND	15.0 per acre
Open Space (designated)	OSP	0.0 per acre
Park – Developed	PKD	5.0 per acre
Park – Undeveloped	PKU	0.5 per acre
Recreational Facility	REC	3.0 per acre
Street/Roadway	STR	0.0 per acre
Undevelopable	UND	0.0 per acre
Utility Facility	UTL	3.0 per acre

<sup>(1)</sup> Proportional to trip generation rates contained in the City of San Diego *Trip Generation Manual* dated September 1998.

Designated Open Space serves primarily to preserve natural landscape and habitat. While access for study and passive recreation is often permitted, these activities are allowed only to the extent they are consistent with the primary purpose of natural preservation. Since this land is essentially “unused” in the customary terms of land use (which relate to human use and development), the trip generation rate is zero. Therefore, the designated Open Space itself receives no benefit from the District improvements and has been assigned a Land Use Factor of zero.

The Recreational Facility category includes those parcels that consist primarily of concentrated facilities, such as swimming pools, gymnasiums, racquetball clubs, etc. Recreational facilities of a more dispersed nature (e.g., parks) have been categorized separately.

While those traveling the streets and roadways visually enjoy the enhanced improvements being maintained by the District, the actual benefit accrues to the lands at the origins and destinations of their trips, not to the lands of the streets and roadways, themselves.

Accordingly, the Streets/Roadways category receives no benefit and has been assigned a Land Use Factor of zero.

The Utility Facility category applies to utility infrastructure facilities, such as water tanks, pump stations, electric power transformer stations, communications facilities, etc. Utility company administrative offices are not included in this category.

### ***Benefit Factor***

The Land Use Factor described above establishes a proportionality of relative intensity of use (or potential use) for the various parcels of land within the District. It does not address the relationship of this use to the specific improvements to be maintained by the District. This relationship is reflected in the Benefit Factor utilized in the assessment methodology.

In determining the Benefit Factor for each land use category, the subcomponents of the benefits of District improvements may include some or all of the following: public safety, view corridors and aesthetics, enhancement of community identity, drainage corridors, and recreational potential. Public safety and aesthetics are the components used for this District.

As Benefit Factors and their subcomponents are intended to reflect the particular relationships between specific land uses within a district and the specific improvements maintained by the district, Benefit Factors will generally vary from one district to another, based on the specific character and nature of the applicable land uses and improvements being maintained.

For a given land use, the overall Benefit Factor is equal to the sum of the subcomponent values. If a land use category receives no benefit from a subcomponent, then a value of zero is assigned to that subcomponent. A composite Benefit Factor of 1.0 indicates that full benefit is received. A decimal fraction indicates that less than full benefit is received.

The applicable benefit subcomponents and resultant composite Benefit Factors determined for the various land use/zoning categories within this District are as shown in Table 3.

**TABLE 3: Benefit Factors by Land Use**

<b>Land Use/Zoning</b>	<b>Public Safety (Max. 0.4)</b>	<b>Aesthetics (Max. 0.6)</b>	<b>Benefit Factor (Max. 1.0)</b>
All Residential	0.4	0.6	1.0
Agricultural	0.4	0.0	0.4
Commercial – Office & Retail	0.4	0.3	0.7
Educational – Primary & Secondary	0.4	0.3	0.7
House of Worship	0.4	0.3	0.7
Industrial	0.4	0.3	0.7
Open Space (designated)	0.4	0.0	0.4
Park – Developed	0.4	0.0	0.4
Park – Undeveloped	0.4	0.0	0.4
Recreational Facility	0.4	0.3	0.7
Street/Roadway	0.4	0.0	0.4
Undevelopable	0.4	0.0	0.4
Utility Facility	0.4	0.0	0.4

**Public Safety.** All land uses are considered to receive the maximum available benefit from the public safety element of District improvements. Public safety is essential to all land uses, and even to lands, such as designated Open Space, held in stewardship with only incidental human use.

**Aesthetics.** The degree of benefit received from the aesthetic qualities of landscaped and hardscaped improvements maintained by the District varies among land use categories. Generally, by nature of their use, residential lands receive the greatest benefit from the reduced traffic congestion, reduced noise levels, greater separation from traffic and generally more tranquil environment provided by landscaped and hardscaped roadway medians and rights-of-way. Commercial and institutional uses, on the other hand, often thrive on higher densities, greater traffic access, and a higher level of activity in the vicinity of their enterprises. These uses, accordingly, receive a lesser degree of benefit from the general insulation and separation provided by the aesthetic elements of District improvements.

Lands in the Agricultural, Open Space, Parks, Street/Roadway, and Utility Facility categories are considered to receive no significant

benefit from the aesthetic elements of District improvements, as enhanced aesthetic quality of other lands in their vicinity does not affect their function, use, or value.

### Unit Assessment Rate

As previously described, all District parcels will be assessed for the maintenance of improvements on the major and arterial streets (i.e., Carmel Valley Road, Carmel Mountain Road, and Camino Del Sur). The assessment costs associated with these improvements (common to all parcels) have been termed “overlay” costs. Zone 2 parcels will be assessed for the additional maintenance of the improvements along the collector and neighborhood streets (i.e., Torrey Meadows Drive and Torrey Santa Fe) that provide access to the area. The assessment costs associated with the improvements on the collector and neighborhood streets have been termed “zone” costs.

The total “overlay” costs have been apportioned to each parcel in the District in proportion to the parcel’s estimated EBUs relative to the total EBUs of all parcels in the District. The total “zone” costs have been apportioned to each parcel in the applicable zone in proportion to the parcel’s estimated EBUs relative to the total EBUs of all parcels within the zone.

The Unit Assessment Rate (rate per EBU) for each zone has been determined as the sum of the district-wide “overlay” unit rate and the individual “zone” unit rate for the zone, as shown in the following equation:

$\text{Unit Assessment Rate} = \text{Overlay Unit Rate} + \text{Zone Unit Rate}$
--

Table 4 summarizes the unit assessment rates for Fiscal Year 2007 and the maximum authorized unit assessment rates for subsequent fiscal years.

**TABLE 4: Unit Assessment Rates**

	<b>Zone 1</b>	<b>Zone 2</b>	<b>Zone 3 <sup>(2)</sup></b>
<b>Fiscal Year 2007 <sup>(1)</sup></b>			
Overlay Unit Rate	\$70.92	\$70.92	\$0.00
Zone Unit Rate	\$0.00	\$37.86	\$0.00
Unit Assessment Rate	\$70.92	\$108.78	\$0.00
<b>Maximum Authorized for Subsequent Fiscal Years <sup>(3)</sup></b>			
Overlay Unit Rate	\$127.25	\$127.25	\$127.25
Zone Unit Rate	\$0.00	\$106.91	\$0.00
Unit Assessment Rate	\$127.25	\$234.16	\$127.25

<sup>(1)</sup> Fiscal Year 2007 begins July 1, 2006 and ends June 30, 2007.

<sup>(2)</sup> Zone 3 parcels will be assessed upon completion of the circulation element providing access to the area, and satisfaction of remaining conditions permitting development.

<sup>(3)</sup> Subject to cost indexing provisions as set forth in this Assessment Engineer's Report.

As described above, the total assessment assigned to each parcel in the District has been calculated, based on the preceding factors, as follows:

<b>Total Assessment = Total EBUs x Unit Assessment Rate</b>
---

Based on the above formula, the EBUs, unit assessment rate, and total assessment calculated for each parcel within the District can be found in the Assessment Roll (Exhibit C).

---

## Summary Results

The Boundary Map for the District is shown in Exhibit A.

An estimate of the costs of the improvements provided by the District is included as Exhibit B to this report.

The assessment methodology utilized is as described in the text of this report. Based on this methodology, the EBUs and Fiscal Year 2007 District assessment for each parcel were calculated and are shown in the Assessment Roll (Exhibit C).

Each lot or parcel of land within the District has been identified by unique County Assessor's Parcel Number on the Assessment Roll and the Boundary Map and Assessment Diagram referenced herein. The net assessment for each parcel for Fiscal Year 2007 can be found on the Assessment Roll.

This report has been prepared and respectfully submitted by:
